Summary

Fullstack Developer with **6+ years of experience** in web, mobile, and backend systems. Strong command of **Node.js**, **React**, **Next.js**, and **NestJS** with hands-on **AWS**, **Docker**, and **Kubernetes** experience. Delivered systems handling **billions of records**, drove **~10% revenue growth**, and reduced processes from **days to hours**.

Skills: TypeScript, Node.js, React.js, Next.js, NestJS, React Native, PostgreSQL, AWS, Docker, Kubernetes, Microservices, CI/CD

Experience

Upbet

February 2025 – May 2026

Fullstack Developer

- Delivered technical integration for game provider migration in compliance with **Brazil's 2024 betting regulation**, building a dynamic provider-control feature and an automated failover system across **microservices on AWS** that detects outages and switches providers in real time, ensuring continuous platform availability
- Participated in an overnight cross-continental database migration of **billions of records** from EU to Brazil using **AWS** and **Python**, ensuring data consistency with zero data loss, establishing full data sovereignty and enabling real-time data delivery for the Brazilian market.
- Developed a fullstack referral system (**Python + Next.js**) in a 2-person team that drove approximately **~10% revenue growth** by enabling peer-to-peer user acquisition within the platform.

FaliFe Technology and Innovation

July 2022 – February 2025

Fullstack Developer

- Designed and maintained a mission-critical automation pipeline integrating **3 databases (PostgreSQL + SQL Server)** with **Lecom**, **DocuSign**, and **Feedz** via **REST APIs**, eliminating manual workflows, including a process reduced from **4 days to 2 hours**. Pipeline operated via daily **cron jobs** where a single failure would halt business operations, demanding high reliability and monitoring standards.
- Built a fullstack asset management system (**NestJS + Next.js**) from scratch to replace **Excel-based** tracking, giving the assets team full control over hundreds of items, including location history, ownership records, and instant reporting that previously required manual consolidation.

Mouts Info

June 2021 – July 2022

Fullstack Developer

- Joined an **AbInBev** project as the sole fullstack developer on a 6-person team that was **1 month behind schedule**. Onboarded independently within **2 weeks** through structured knowledge-transfer sessions with teammates, then delivered key features in **React + Express.js** that brought the project back on track within **1 month**.
- Independently designed and delivered a large-scale data import pipeline for a US manufacturing client, processing **millions of Excel records** into a relational database using **Express.js**. Architected an **AWS message queue** for asynchronous batch processing to prevent API blocking under high load, delivered solo within **2 weeks**.

Myp-7 Tecnologia

June 2020 – June 2021

Fullstack Developer

- Joined as the sole **React Native** developer and was promoted to fullstack within **1 month** after consistently delivering fixes and improvements under same-day deadlines during live client sessions, as the only mobile developer in a 5-person company.
- Built a mobile inventory management feature for a large wholesale distributor in Amazonas, integrating **QR Code scanning** and **voice recognition** to accelerate stock-taking operations and eliminate manual counting processes.

Education

Universidade Paulista

Computer Science

Bachelor's Degree

2020 – 2024
